*DryJoist, has been named as one of the 50 Most Innovative New Products of 2008 by Professional Remodeler magazine. The program recognizes technological advances in the residential building market.*

*DryJoist, the first and only structural deck drainage system, is comprised of a series of easily interlocking panels. When assembled, DryJoist creates a finished ceiling, waterproofing and the structure of the deck all in one system.*

- ❖ Unlike other waterproofing solutions, DryJoist mounts on top of beams and posts. Nothing penetrates the water channels.
- ❖ Provides support for deck boards on 4" centers. Elaborate patterns can be easily created with your deck board of choice.
- ❖ Provides a finished ceiling for your outdoor living area.
- ❖ Surface mount railing clips allow railing to be installed without penetrating the waterproof surface.
- ❖ Can span 8' between beams and replaces traditional joists in new construction.
- ❖ Compatible with hidden fastener systems.
- ❖ Lights and ceiling fans can be mounted directly to the DryJoist with all wiring hidden in the screw channel.
